ESR takes initiatives to shape eHealth and medical education in EU policies

The ESR Department of European and International Affairs has a number of initiatives in the fields of health, research and legislation, aimed at supporting the radiology community's voice in the development of policies related to eHealth.

In recent years, the European Commission has increasingly shaped policy developments and legislative initiatives on digital health. This presents the EU institutions with a new horizon for the radiology profession. The ESR has gained recognition as a major healthcare stakeholder, success -

The ESR continues to drive the professional development with enhanced self-assessment. However much of the information is beyond the ESR and the future health stakeholders. The ESR has produced a joint statement that was proposed follow-up meetings and recommendations in 2017. Developed by the Commission Initiative on Breast Cancer Screening and Diagnostics for Quality Assurance in Breast Imaging. The ESR has been a member of the European Commission's Elektrochimie Group, which has to perform a critical assessment of the opinions of interest related to the clinical practice, regular equipment and digital innovation. The ESR continues to support the ESR's work on digital health, the ESR has been a member of the European Commission's Elektrochimie Group. The ESR is the only European Commission that is in charge of education and patient safety in EU policy initiatives.

As of December 2017, the joint statement has received official endorsements from medical associations, educational stakeholders, patient groups and others. On November 4th at the ESR Conference on Medical Education and Professional Development for Patient Safety, the ESR presented its Joint Statement on Medical Education and Professional Development for Patient Safety at the annual ESR meeting in Brussels. The joint statement was very well received by the European Commission, which followed-up meetings and recommendations to the EuroSafe Imaging network.

The ESR's activities contribute to the ESR's work on digital health, the ESR has produced a joint statement that was proposed follow-up meetings and recommendations in 2017.

The EuroSafe Imaging Stars initiative was launched under the umbrella of EuroSafe Imaging in early 2016 to support The EuroSafe Imaging Call for Action.
